

## Alignment Procedure

The ST-2050F comes from the factory tuned. Only a qualified technician is allowed to tune this transmitter.

Equipment needed: a service monitor that can measure field strength and frequency.

Tuning tool.

1. Adjust the service monitor to the channel frequency.
2. Tune T101, T102, T103, T104, & T105 for maximum output.
3. Adjust VR103 to the correct frequency
