Columbia, Maryland 21046

ATTENTION: Mr. Richard Fabina

SUBJECT: RT-1401B Type Acceptance

REFERENCE:

Dear Mr. Fabina,

As you may be aware Telephonics has recently acquired a group of Radar products from Honeywell (formally Allied Signal). Telephonics has transferred all documentation and manufacturing assets to our New York facilities for both current and legacy products.

Our production facility, as one of the current products, will manufacture the RDR-1400C Color Weather Radar. The RT-1401B, which has had a prior equipment authorization granted by the FCC, is the receiver transmitter for this Radar. This cover letter should be found attached to a new request for equipment authorization (Form 731) submitted electronically.

If there are any questions associated with this correspondence or if additional information is required please contact George Rufle, Principal Engineer, at (631) 755-7625 or Paul Mitchell, Lead Quality Engineer, at (631) 549-6328.

Sincerely,

—  
George Rufle  
Principal Engineer  
Telephonics
