Subject: Class II Permissive Change for FCC ID: O4O-EYFPA

Gentlemen:

We would like to request a Class II Permissive change for FCC ID: O4O-EYFPA.

Changes filed under this application are:

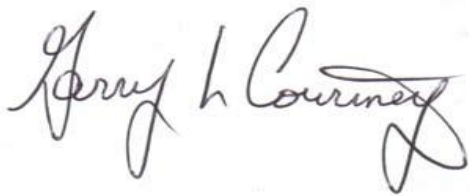

Battery voltage increased from 18V to 21.6V.

Motor winding changed to accommodate higher voltage, from ( $\phi 1.1 \times 6T$ ) to ( $\phi 1.1 \times 5T$ ).

The printed circuit board and circuitry remain the same.

Testing has shown that the changes do not cause the RF parameters to exceed the spec limits.

Sincerely,

A handwritten signature in dark ink, reading "Garry L. Courtney". The signature is fluid and cursive, with the first name "Garry" and last name "Courtney" clearly legible. There is a small, faint circular stamp or mark to the right of the signature.

Garry L. Courtney
