**Foreword**

Honorific device user, thank you for choosing our mobile phone!

Our MiFi are according with the communication industry standards of PRC, and also according with the standards of European, and are approved for GSM networks.

Your device may be used internationally with various networks depending on your roaming arrangements with your service provider.

To use this device, you must subscribe to a GSM service from a provider. We have included many features in this device, but their function depends on the features available with your subscribed wireless network. Please contact your service provider for more information.

We strongly recommend you carefully read and understand this manual before using your phone in order to keep it under best conditions for your effective usage and utmost satisfaction.

**Safety**

- Never attempt to disassemble your device. You alone are responsible for how you use your device and any consequences of its use.

- As a general rule, always switch off your device wherever the use of a device is prohibited.

- Use of your device is subject to safety measures designed to protect users and their environment.

- Do not use your device in damp areas (bathroom, swimming pool,). Protect it from liquids and other moisture.

- Do not expose your device to extreme temperatures lower than -10°C and higher than +55°C.

- Please note that the ambient temperature range for

normal charging of mobile device is 0 °C ~ 45 °C. Do not charge at an ambient temperature below 0 °C or above 45 °C, as this will result in reduced battery performance and reduced life. Charging for too long at too high or too low ambient temperatures can damage unfilled or swelled batteries, and there is a risk of battery explosion

- The physicochemical processes created by chargers impose temperature limits when charging the battery. Your device automatically protects the batteries in extreme temperatures.

- Do not leave your device within the reach of small children (certain removable parts may be accidentally ingested).

Electrical safety

- Only use the chargers listed in the manufacturer's catalogue. Using any other charger may be dangerous; it would also invalidate your warranty. Line voltage must be exactly the one indicated on the charger's serial plate.

**Aircraft safety**

When traveling by plane, you will need to switch your phone off when so instructed by the cabin crew or the warning signs. Using a mobile phone may be dangerous to the operation of the aircraft and may disrupt the phone network.

Its use is illegal, and you could be prosecuted or banned from using cellular networks in the future if you do not abide by these regulations.

**Explosive materials**

Please comply with warning signs at petrol station when personnel asking you to switch your phone off. You will need to comply with radio equipment usage restrictions in places such as chemical plants, fuel depots and at any location where blasting operations are under way.

**Electronic equipment**

This device model has been tested and meets radiofrequency exposure guidelines when used

**As follows:**

- Against the ear: place or receive a phone call and hold the phone as you would a wire line telephone.

- Body worn when transmitting, place the phone in a carry accessory that contains no metal and positions the phone a minimum of 5mm from your body. Use of other accessories may not ensure compliance with radiofrequency exposure guidelines.

- If you do not use a body worn accessory and are not holding the phone at the ear, position the phone a minimum of 5mm from your body.

- Data operation: when using a data feature, position the phone a minimum of 5mm from your body for the whole

5

To avoid the risk of demagnetization, do not let electronic devices close to your phone for a long time.

**Electronic medical equipment**

Your phone is a radio transmitter which may interfere with electronic medical equipment or implants, such as hearing aids, pacemakers, insulin pumps, etc. It is recommended that a minimum separation of 5mm be maintained between the phone and an implant. Your doctor or the manufacturers of such equipment will be able to give you any advice you may need in this area.

**Hospitals**

Always make sure that your phone is switched off in hospitals when so instructed by warning signs or by medical staff.

**Road safety**

Only use your phone when driving. In order to give your full attention to driving, stop and park safely before making a call. You must comply with any current legislation.

**Distance of operation**

This device model has been tested and meets radiofrequency exposure guidelines when used

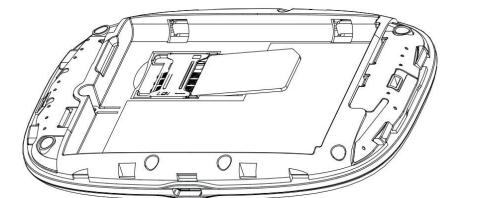

duration of the data transmission.

**Environmentally friendly disposal**  
Old electrical appliances must not be disposed of together with the residual waste, but have to be disposed of separately. The disposal at the communal collecting point via private persons is for free. The owner of old appliances is responsible to bring the appliances to these collecting points or to similar collection points. With this little personal effort, you contribute to recycle valuable raw materials and the treatment of toxic substances.
