

Quick Start Guide

TB352FU

TB352XU

Lenovo

Get started

- Read this guide carefully before using your device.
- All pictures and illustrations in this guide are for your reference only. The actual product may vary.

Overview

- | | | |
|------------------|-------------------|-------------------|
| 1 Volume buttons | 2 Action key | 3 Card tray |
| 4 Audio jack | 5 USB-C connector | 6 Smart connector |
| 7 Power button | | |

- 2 Action key is a customized shortcut. Press once or twice to open specific apps, web pages, or shortcuts. The feature may differ based on the software updates.

Install cards

Turn off your device before inserting or removing a card.

🔧 If you're using a third-party SIM, contact your carrier for more details.

Charge your device

For environmental reasons this package may not include a charger in certain countries or regions. This device can be powered with most USB power adapters and a cable with USB Type-C plug. Use a USB Power Delivery compliant charger that supports power output above 15 W for tablet charging.

It is recommended to use a charger that complies with applicable national/regional regulations for mobile device adapters. Only use a charger that complies with international and regional safety standards (such as EN/IEC/UL 62368-1) for charging. Other chargers may not comply with applicable safety standards, and using such chargers to charge may result in injury or death.

Help and more

European Union (EU) / United Kingdom (UK) compliance statement

Lenovo (Singapore) Pte. Ltd. declares that the radio equipment types: TB352FU, TB352XU are in compliance with EU Radio Equipment Directive 2014/53/EU.

Lenovo (Slovakia) Ltd. declares that the radio equipment types: TB352FU, TB352XU are in compliance with UK Radio Equipment Regulation SI 2017 No. 1206.

The full text of the system declarations of conformity are available at :

<https://www.lenovo.com/us/en/compliance/eu-doc> for EU and

<https://www.lenovo.com/us/en/compliance/uk-doc> for UK.

This radio equipment operates with the following frequency bands and maximum radio-frequency power:

Model Name	Frequency Bands	Maximum Power (dBm)
TB352FU	WLAN 2400-2483.5MHz	20
	WLAN 5150-5250MHz	20
	WLAN 5250-5350MHz	20
	WLAN 5470-5725MHz	20
	WLAN 5725-5850MHz	14
	Bluetooth 2.4 GHz	10
	NFC 13.56 MHz	42dBuA/m at 10m

Model Name	Frequency Bands	Maximum Power (dBm)
TB352XU	GSM 900	33.5
	GSM 1800	30.5
	WCDMA I	24
	WCDMA VIII	24
	LTE B1,3,5,7,8,20,28,38,40,41	24
	WLAN 2400-2483.5MHz	20
	WLAN 5150-5250MHz	20
	WLAN 5250-5350MHz	20
	WLAN 5470-5725MHz	20
	WLAN 5725-5850MHz	14
	Bluetooth 2400-2483.5MHz	10
	NFC 13.56 MHz	42dBuA/m at 10m

Restrictions of use:

Usage of this device is limited to indoor in the band 5250 to 5350 MHz.

	AT	BE	BG	CH	CY	CZ	DE	DK	EE	EL	ES	FI
	FR	HR	HU	IE	IS	IT	LI	LT	LU	LV	MT	NL
	NO	PL	PT	RO	SE	SI	SK	TR	UK	UK (NI)		

Specific Absorption Rate information

THE DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES.

The device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organization (ICNIRP) and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR.

Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for your device model are listed below:

Maximum SAR for this model and conditions under which it was recorded.				
EU/UK 10g SAR Limit (2.0 W/kg)	TB352FU	Body-worn (0mm)	WLAN, Bluetooth	1.439 W/kg
EU/UK 10g SAR Limit (4.0 W/kg)		Limb (0mm)	WLAN, Bluetooth	1.439 W/kg
Europe 10g SAR Limit (2.0 W/kg)	TB352XU	Body-worn (0mm)	WLAN, BT, GSM, WCDMA ,LTE	1.481W/kg
Europe 10g SAR Limit (4.0 W/kg)		Limb (0mm)	WLAN, BT, GSM, WCDMA ,LTE	1.481W/kg

🔗 The above information is for EU countries and UK. Please refer to the actual product for supported frequency bands in other countries.

During use, the actual SAR values for your device are usually well below the values stated. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of the device is automatically decreased when full power is not needed for the data connection. The lower the power output of the device, the lower its SAR value. If you are interested in further reducing your RF exposure then you can easily do so by limiting your usage or simply using a hands-free kit to keep the device away from the body.

Charging capabilities and the compatible charging devices of this product

The power delivered by the charger must be between min 15 Watts required by the radio equipment, and max 20 Watts in order to achieve the maximum charging speed. And the device supports USB Power Delivery (USB-PD).
