Safety, Warranty & Quick Start Guide

TB571FU

Get started

- Read this guide carefully before using your device.
- All pictures and illustrations in this guide are for your reference only. The actual product may vary.

Overview

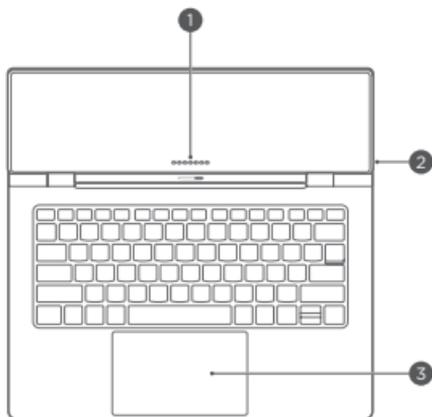

- | | | |
|-------------------------|------------------------------------|------------------------|
| 1 Volume buttons | 2 Microphones | 3 Ambient light sensor |
| 4 Time-of-flight sensor | 5 Front camera | 6 LED indicator |
| 7a/b Pen charging areas | 8 Speakers | 9 USB-C1 connector |
| 10 USB-C2 connector | 11 Power button/Fingerprint sensor | 12 Flash |
| 13 Rear cameras | 14 Smart connector | |

- USB-C1 connector: Supports 68 W fast charging, USB 3.2 Host and Slave modes, DisplayPort Alt mode, and complies with the EU Directive (EU) 2022/2380.
- USB-C2 connector: Supports 68 W fast charging, USB 2.0 Host mode, and is the only connector supporting DisplayPort-in functionality.

Keyboard

KB600U

① Pogo-pin connector

② USB-C3 connector

③ Trackpad

✎ USB-C3 connector: Supports a maximum of 45 W charging and USB 2.0 Host mode.

Using the keyboard

• Attach your tablet

• Detach your tablet

Charge your device

For environmental reasons, this package may not include a charger in certain countries or regions. This device can be powered with most USB power adapters and a cable with USB Type-C plug. Use a USB Power Delivery compliant charger that supports power output no less than 27 W for tablet charging; otherwise, the tablet may not charge properly.

It is recommended to use a charger that complies with applicable national/regional regulations for mobile device adapters. Only use a charger that complies with international and regional safety standards (such as EN/IEC/UL 62368-1) for charging. Other chargers may not comply with applicable safety standards, and using such chargers to charge may result in injury or death.

Help and more

To get more information and download the *User Guide*, go to <https://support.lenovo.com>.

European Union (EU) / United Kingdom (UK) compliance statement

Lenovo (Singapore) Pte. Ltd. declares that the radio equipment type: TB571FU is in compliance with EU Radio Equipment Directive 2014/53/EU.

Lenovo (Slovakia) Ltd. declares that the radio equipment type: TB571FU is in compliance with UK Radio Equipment Regulation SI 2017 No. 1206.

The full text of the system declarations of conformity are available at :

<https://www.lenovo.com/us/en/compliance/eu-doc> for EU and

<https://www.lenovo.com/us/en/compliance/uk-doc> for UK.

This radio equipment operates with the following frequency bands and maximum radio-frequency power:

Model Name	Frequency Bands	Maximum Power (dBm)
TB571FU	WLAN 2400 - 2483.5 MHz	< 20
	WLAN 5150 - 5250 MHz	< 23
	WLAN 5250 - 5350 MHz	< 20
	WLAN 5470 - 5725 MHz	< 20
	WLAN 5725 - 5850 MHz	< 14
	WLAN 6E 5945 - 6425 MHz	< 23
	Bluetooth 2400 - 2483.5 MHz	< 20
	WPT 111 kHz - 145 kHz	-0.87 dBuA/m@10m

Restrictions of use:

Usage of this device is limited to indoor in the band 5250 to 5350 MHz and 5945 to 6425 MHz.

	AT	BE	BG	CH	CY	CZ	DE	DK	EE	EL	ES	FI
	FR	HR	HU	IE	IS	IT	LI	LT	LU	LV	MT	NL
	NO	PL	PT	RO	SE	SI	SK	TR	UK	UK (NI)		

Specific Absorption Rate information

THE DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES.

The device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organization (ICNIRP) and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR.

Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for your device model are listed below:

Maximum SAR for this model and conditions under which it was recorded.				
EU/UK 10g SAR Limit (2.0 W/kg)	TB571FU	Body (0 mm)	WLAN, Bluetooth	1.518 W/kg
EU/UK 10g SAR Limit (4.0 W/kg)		Limb (0 mm)	WLAN, Bluetooth	1.518 W/kg

🔗 The above information is for EU countries and UK. Please refer to the actual product for supported frequency bands in other countries.

During use, the actual SAR values for your device are usually well below the values stated. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of the device is automatically decreased when full power is not needed for the data connection. The lower the power output of the device, the lower its SAR value. If you are interested in further reducing your RF exposure then you can easily do so by limiting your usage or simply using a hands-free kit to keep the device away from the head and body.

Precautions for use of the equipment

In accordance with French regulations, the following are precautionary recommendations only. No danger associated with the use of a mobile device has been observed. You can limit your exposure to radio-frequency energy:

- By using your device in areas with good network reception conditions (for example: display shows four or five bars). Other areas may have poor reception, such as an underground car park, when traveling by train or car, etc.
- By using a hands-free kit to keep your device away from your head and body. In this latter case, pregnant women are advised to keep their device away from their abdomen. It is also recommended that adolescents keep their devices away from the lower part of their abdomen.
- By making reasonable use of mobile devices by children and adolescents, for example by avoiding night-time communications and limiting the frequency and duration of calls.
- Precautions should be taken by wearers of electronic implants (cardiac pacemakers, insulin pumps, neurostimulators, etc.) concerning in particular the distance between the mobile device and the implant (20 cm) and the position of the device, during the call, on the side opposite the implant. In addition, always follow the local laws and regulations, which govern how you can use mobile devices while driving.

Prolonged use of any device may cause discomfort. Use your device in a safe area with comfortable ambient lighting and take frequent breaks if you feel discomfort. Seek medical advice if symptoms persist. In rare cases, flashing patterns or lights, for example in video games or movies, may cause seizures or blackouts. If you suffer any seizures or blackouts, or have a history of seizures, stop using your device and seek medical advice.

Energy Label, ECO Design, and Power Management

Energy Label:

The Energy Label and product information defined in Regulation (EU) 2023/1669 is available at: <https://eprel.ec.europa.eu/screen/home>.

ECO Design Information:

For additional Energy and Eco design information about our products is available at: <https://www.lenovo.com/ecodeclaration>.

Power Management:

Deactivate battery saver and charge optimization functions may increase the energy consumption of the device.

Charging capabilities and the compatible charging devices of this product

The power delivered by the charger must be between min 27 Watts required by the radio equipment, and max 68 Watts in order to achieve the maximum charging speed. And the device supports USB Power Delivery (USB-PD).

Important safety information

Regulatory information

Device models equipped with wireless communications comply with the radio frequency and safety standards of any country or region in which it has been approved for wireless use. In addition, if your product contains a telecom modem, it complies with the requirements for connection to the telephone network in your country.

Be sure to read the *Regulatory Notice* for your country or region before using the wireless devices contained in your device. To obtain a PDF version of the *Regulatory Notice*, go to <https://support.lenovo.com>.

Legal notices

Lenovo and the Lenovo logo are trademarks of Lenovo in the United States, other countries, or both.

Other company, product, or service names may be trademarks or service marks of others.

LIMITED AND RESTRICTED RIGHTS NOTICE: If data or software is delivered pursuant a General Services Administration "GSA" contract, use, reproduction, or disclosure is subject to restrictions set forth in Contract No. GS-35F-05925.

Caution about high volume usage

Warning: Exposure to loud noise from any source for extended periods of time may affect your hearing. The louder the sound, the less time is required before your hearing could be affected. To protect your hearing:

- Limit the amount of time you use headsets or headphones at high volume.
- Avoid turning up the volume to block out noisy surroundings.
- Turn the volume down if you can't hear people speaking near you.

If you experience hearing discomfort, including the sensation of pressure or fullness in your ears, ringing in your ears or muffled speech, you should stop listening to the device through your headset or headphones and have your hearing checked.

To prevent possible hearing damage, do not listen at high volume levels for long periods.

Safety instructions for parents and adult supervisors

The device is not a toy. As with all electrical products, precautions should be observed during handling and using of electrical products to reduce the risk of electric shock. If parents choose to allow children to use the device, they should caution his or her child about the potential hazard while using and handling the mobile device.

Parents should inspect the mobile device (including the ac power adapter and the small part, as applicable) periodically for damage. Routinely check this mobile device to ensure that the device is working properly and is safe for children to use.

Internal rechargeable battery warning (for selected models)

Danger: Do not attempt to replace the internal rechargeable lithium ion battery. Replacing the original battery with an incompatible type may result in an increased risk of personal injury or property damage due to explosion, excessive heat, or other risks. Do not attempt to disassemble or modify the battery pack. Attempting to do so can cause a harmful explosion or battery fluid leakage.

When disposing of the battery, comply with all relevant local ordinances or regulations. Do not dispose the battery pack in municipal waste. Dispose used batteries according to the instructions.

The battery pack contains a small amount of harmful substances.

To avoid injury:

- Keep the battery pack away from open flames or other heat sources.
- Do not expose the battery pack to water, rain, or other corrosive liquids.
- Do not leave the battery in an environment with extremely high temperature.
- Avoid short-circuiting the battery pack.
- Keep the battery pack out of reach of small children and pets.
- Do not leave the battery in an environment with extremely low air pressure. It may result in an explosion or the leakage of flammable liquid or gas from the battery.

To extend battery life, we recommend charging the battery to at least 30% to 50% capacity each time, and recharging it every three months to prevent over discharge.

Driving precautions

Responsible and safe driving is your primary responsibility when driving a vehicle. Always obey local laws and regulations.

Seizures, blackouts, eye strain and discomfort

This device may display flashing images or loud sounds.

Medical devices

This device may interfere with pacemakers and other medical devices. If you use an implantable pacemaker, defibrillator, or other medical device, please consult your healthcare provider and device manufacturer before using this mobile device. If you use a pacemaker or defibrillator, it is recommended that you pay attention to the following precautions:

Always keep this mobile device at least 20 cm (8 inches) away from the pacemaker or defibrillator. Please use the mobile device on the side away from the pacemaker or defibrillator to minimize the possibility of interference.

When you suspect that interference is being caused, the mobile device should be turned off immediately.

Extreme heat or cold

Don't use your device in temperatures below 0°C or above 40°C. Don't store/transport your device in temperatures below -20°C or above 60°C.

Operational warnings

Obey all posted signs when using devices in public areas.

Potentially explosive areas: potentially explosive areas are often, but not always, posted and can include blasting areas, fueling stations, fueling areas (such as below decks on boats), fuel or chemical transfer or storage facilities or areas where the air contains chemicals or particles, such as grain dust or metal powders.

Turn off your device before entering such an area and do not charge batteries. In such areas, sparks can occur and cause an explosion or fire.

Hospitals

Switch off your wireless device when requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

Aircraft

Switch off your wireless device whenever you are instructed to do so by airport or airline staff.

Consult the airline staff about the use of wireless devices on board the aircraft, if your device offers a 'flight mode' this must be enabled prior to boarding an aircraft.

Environmental, recycling, and disposal information

General recycling statement

Lenovo encourages owners of information technology (IT) equipment to responsibly recycle their equipment when it is no longer needed. Lenovo offers a variety of programs and services to assist equipment owners in recycling their IT products. For information on recycling Lenovo products, go to <http://www.lenovo.com/recycling>.

Important Battery Recycling & WEEE information

Don't dispose of your product or battery with your household waste. Refer to the User Guide that came with your product for further information, or go to <https://www.lenovo.com/recycling>.

Recycling information for Japan

Recycling and disposal information for Japan is available at: <http://www.lenovo.com/recycling/japan>.

Additional recycling statements

Additional information about recycling device components and batteries is in your *User Guide*. See "**Accessing your *User Guide***" for details.

US & Canada Only

Restriction of Hazardous Substances Directive (RoHS)

Türkiye

Lenovo products sold in Türkiye, on or after June 1, 2009, meet the requirements of the former Republic of Türkiye Restriction of Hazardous Substances legislation from 30th of May 2008 and the Control of Waste Electrical and Electronic Equipment Regulations from 22nd of May 2012("Türkiye RoHS"). Complies with the WEEE regulation.

India

Lenovo products sold in India, on or after May 1, 2012, meet the requirements of the India E-waste (Management) Rules ("India RoHS").

Vietnam

Lenovo products sold in Vietnam, on or after September 23, 2011, meet the requirements of the Vietnam Circular 30/2011/TT-BCT ("Vietnam RoHS").

Singapore

Lenovo products sold in Singapore, on or after June 1, 2017, meet the requirements of Government Gazette order No. S 263/2016 Restriction of Hazardous Substances in Electrical and Electronic Equipment in Singapore ("SG-RoHS").

European Union (EU) / United Kingdom (UK) RoHS

This Lenovo product, with included parts (cables, cords, and so on) meets the requirements of EU Directive 2011/65/EU as amended by Directive 2015/863/EU and UK SI 2012 No. 3032 on the restriction of the use of certain hazardous substances in electrical and electronic equipment ("RoHS recast" or "RoHS 2").

For more information about Lenovo progress on RoHS, go to:

<https://www.lenovo.com/rohs-communication>.
