**Request for Tech. Info.: 9/28/00**

Dear Katie:

Transmitted herewith, on behalf of Wittsburg Enterprises Ltd. is an amendment provided in response to the request for technical information dated September 28, 2000.

1. We confirmed that the WD-2000T contains a switch SW 1 on the schematic diagram that automatically deactivates the final amplifier (by removing all of its bias voltages) so no output is generated by the transmitter 3 milliseconds after the switch is released.

We trust this information is sufficient to issue the grant ASAP. If you have any further questions, please do not hesitate to contact us.
