Re: CONFIDENTIALITY REQUEST FOR **LPV-01 Internal Photos and user manual**

To Whom It May Concern:

We hereby request that the internal photographs of our device and user manual be granted long term confidentiality as they reveal sensitive and proprietary information that is not available to the general public.

- Our device is a non-consumer device that the end product will be sold to governmental entities or other industrial operators and will only be sold under formal contracts with suitable intellectual property protections.
- Our device is installed at locations that are not accessible to anyone but authorized personnel. Installation locations include: under the road surface, sealed with adhesive epoxy; permanently embedded in concrete; or mounted on a roadside tower or structure where it is out of reach or with one-way screws or other locking mechanisms. To facilitate these types of installations, our device is designed to operate with batteries for 10 to 30 years without requiring replacement.
- To show required detail, some of the photographs are taken without the antenna that is permanently attached. In normal course, removing the antenna will usually damage the unit making the inside views inaccessible to users.

Sincerely,

Balu Subramanya  
President
