October 24, 2001

RE: Bromax Communications
FCC ID: 06M-WM250

There are a couple of items which need clarification on this Application.

- 1.) Form 731 lists RF Power Output as 68mW. Measured Power Output lists 27mW. Specifications in manual list 31.6mW (typical). Which is correct?
- 2.) Please provide greater detail on the antennas used during testing. Identify by type, gain; and, if possible, manufacturer and part number. Please upload this information as a separate document to the RF Exposure Exhibit.

Thanks,

William H. Graff
Examining Engineer
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
