

TITLE: PLI Evaluation Report (RFI)
DRAWING: 117850
BY: Zane Traub

FCC ID: O725346X

Page 1 of 1

Issued: 17 Aug 2000

Approved: Lee Pulver

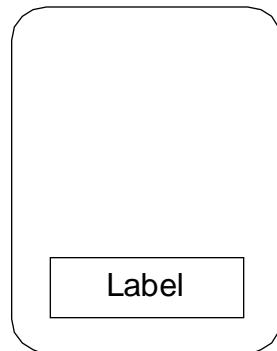

1.0 Mandatory Labeling and Operators' Manual Information and Shipping Documents

1.1 Label

Illustration 1.0 on the next page illustrates the actual label (three times the actual size) with the appropriate wording. Note the letters "EMI" on the label which abbreviate "Electromagnetic Interference". Organizations like the Federal Communications Commission and their respective limits are listed on the label.

Also notice the letters "NRTL", which abbreviate "Nationally Recognized Testing Laboratory" as recommended by OSHA and the National Electrical Code for the United States. For Pulver Laboratories product Certification labels used for safety Certification, the phrase "SAFETY" appears on the label. Safety Certifying organizations like Pulver Laboratories are listed on the label adjacent to the testing standards used during equipment evaluation.

A rough sketch of the label location is shown below.
