

SMART COMMUNICATION

October 15, 2009

Federal Communications Commission

Re:

FCC ID O78SC580A

Applicant:

Smart Communications LTD

To Whom It May Concern:

The applicant would like to have the frequency range 400 ~ 470 MHz appear on the FCC Grant of Certificate for a Part 90 certification. This frequency range is regarded as usual and customary by United State Federal Government and its various departments, user organizations and the military to appear on the face of the equipment Grant of Certificate.

The applicant plans to ensure the USA users, other than those specifically identified in the letter, not operate within bands 406 ~ 406.1 MHz as controlled by the users' FCC station license.

This device will not be marketed to USA users, other than those identified in the letter, namely the US Government and its various departments and military, for operation in 400 ~ 406.1 MHz frequency range.

Sincerely,

George Kishikawa
