October 12, 2000

Phoenix, Unicorn and Pegasus Counter/Classifiers FCC ID#O7O-UPP

The following modifications were required to achieve EMI compliance:

1. Ferrico NF-100 ferrite on serial cable at EUT end.
2. Ferrico NF-130 ferrite with one turn on internal serial cable harness near receptacle.
3. Ferrico NF-100 ferrite on internal power harness near daughter board with one turn.
4. Schaffner P/N FN660-1/06 line filter near DC receptacle bolted to chassis ground.
5. Change loop board C9, C10 to .056 $\mu$ F. Change loop board C11, C12 to .068  $\mu$ F

The manufacturer certifies that they will incorporate these changes into all production units.
