RE: Comments of June 29, 2005
APPLICATION: O7X-BLDS01 Pelican Accessories

Dear Mr. Graff:

Below are the comments that you have provided regarding the application for certification referenced above. Our responses to those comments are in ***bold italic***. Many responses refer you to additional exhibit(s) which has been uploaded to the application folder at the ATCB website.

Thank you for your attention. Please feel free to contact us for any additional information that you may require.

Regards,

Gregory M. Snyder
Chief EMC Engineer, Wireless/Telco Services Manager

Brian J. Dettling
Documentation Specialist

WLL Project: 8770

1) The label placement photos show labels on both the "street controller" and the "receiver/transmitter". Is this true? It is impossible to read the specific labels on these devices using the photo resolution provided. Moreover, the receiver might not qualify under 15.101 for any FCC ID. Please review this labeling with your client. Regardless, please be advised that if Certification for the "receiver/transmitter" applies it must be under its own unique FCC ID.

R. Both the "street controller" (i.e. Controller Pad) and the "receiver/transmitter" (i.e. Host) contain a transmitter and receiver. This application is specifically for the Controller Pad. Both the Pad and Host are sold together but the Host will have its own unique ID.

2) The Manual on page 1 refers to unknown FCC IDs. Is this the correct manual for this device?

R. The manual has been updated to show the correct FCC ID. The O7X-BLDS01 is for the Pad and the O7X-BLDS02 is for the Host. The units are sold as a set and the manual covers both units.

3) The Test Setup photos show the “street controller” along with what appears to be an X-Box console and a TV receiver. My understanding is that current Certification is only sought for the “street controller”. Shouldn't this be the only item shown on the turntable during testing?

R. As the unit is a system the setup included the Controller Pad and the Host (plugged into the X-Box). This was done to have a complete test setup.

4) FYI: Test Reports submitted to a TCB should show evidence of accreditation. Please be sure this information appears within your filings.

R. The Abstract and Section 2.4 of the test report lists Washington Laboratories NVLAP Accreditation.
