Radio Board in place on Main Board

Radio Board Removed

Radio Board Top

A photograph of a green printed circuit board (PCB) with various electronic components and connectors. The board is rectangular and features a complex pattern of copper traces and numerous circular holes for components. On the left side, there is a vertical strip of black connectors with gold-colored pins. On the right side, there is a vertical strip of black connectors with gold-colored pins. In the center, there are two circular silver-colored components, possibly capacitors or inductors, and a small black component. The board is mounted on a light-colored surface.
