

## Request for Class II Permissive Change

October 25, 2017

Federal Communication Commission  
Equipment Authorization Division  
Application Processing Branch  
7435 Oakland Mills Road  
Columbia, Maryland 21046

FCC ID : O8CJM1L2S  
Applicant : Aplix Corporation

To Whom It May Concern:

This is to request a Class II permissive change for FCC ID: O8CJM1L2S, originally granted on August 2, 2013 and all its permissive changes.

We changed the following points from the original model.

- Allowance of co-location for the specific devices

Please refer to attached user manual for details of these modifications.

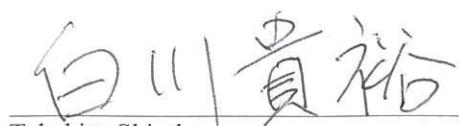

Meanwhile we submit the following documents related to this change. There is no change before and after change except for these documents.

<input checked="" type="checkbox"/>	RF Exposure sheet
<input type="checkbox"/>	External Photo
<input type="checkbox"/>	Internal Photo
<input checked="" type="checkbox"/>	User Manual
<input type="checkbox"/>	Label drawing/ location
<input type="checkbox"/>	Block Diagram
<input checked="" type="checkbox"/>	Specification
<input type="checkbox"/>	Schematic Diagram
<input type="checkbox"/>	Parts List

This time, we did not perform the testing, however we confirmed that this product still meets the minimum requirements of the applicable rules of FCC even under the following co-location environment. Please note that the specified radios can be co-existed in a host device such as a home appliance and that each radio has an independent antenna and the antenna is not shared by multiple radios.

Thank you for your attention to this matter.

Sincerely,

Takahiro Shirakawa  
Aplix Corporation
