FCC DTS UII declaration

September 17, 2021
Federal Communications Commission
7435 Oakland Mills Road
Columbia, Maryland 21046
USA

FCC ID: O9YZIS3
ISED ID:22952-ZIS3

Gentlemen:

Please be advised that the BLE Camera is manufactured for the global market but when marketed in the U.S. under FCC ID: O9YZIS3 and ISED ID:22952-ZIS3 . The nonvolatile memory (NVM) will be programmed at the factory to only actively scan and operate on these specific channels during normal WLAN operation. During Wi-Fi Direct mode the device may act as a group owner (GO) to establish a peer-to-peer (P2P) network including conditions when no master device is present on these specific channels.

Channels 1-11,2412-2462MHz 802.11b mode

Channels 1-11, 2412-2462MHz 802.11g mode

Channels 1-11, 2412-2462MHz 802.11n mode (20MHz channel)

Channels 3-11, 2422-2452MHz 802.11n mode (40MHz channel)

This information when programmed into the NVM will not be accessible and cannot be changed by the end user. The transmitter is approved as a non-software defined radio and OEMs and third party system integrators do not have the ability through software to allow configuration controls that would permit the device to operate outside the grant conditions per FCC KDB 594280.
