 - + Size: RX 3.5" X 1.5", TX 1.25" X 1.75"

+ FIRST AID FOR YOUR LOST SKIS

The SKI FINDER eliminates the need for cumbersome powder cords. The compact transmitter activates a loud audible alarm from the receivers (that are secured to the skis) up to 100 feet from the skier. The SKI FINDER is personally encoded for your skis only.

The SKI FINDER can also be used to locate your skis at ski racks, chalets etc. Just press the locate button on the transmitter and the receivers play one of nine different 5 second chimes of your selection.

Available in Patrol Red + or Expert Black ♦♦
