RE: Lester Electrical of Nebraska Inc.

FCC ID: OBH22250 (Class II Permissive Change)

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Please note that for devices in the 902-928 MHz band under 15.249, averaging is not allowed for the fundamental emissions as shown in your report. However, since the peak measurements provided in the report meets the 94 dBuV/m limit, no further information is needed.

A handwritten signature in black ink, appearing to read "Timothy R. Johnson".

Timothy R. Johnson  
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
