

Technical Description

| Description | Function | Component |
|----------------------------------|--------------------------------------|-----------------|
| Antenna | Received modulation RF signal | ANT1 |
| Low Pass Filter | Suppression of spurious emissions | C10.L1.C3.C4.L2 |
| Constant voltage power supply | Constant voltage to 3V | D3.U2 |
| frequency mixer | Generate 315MHz mixer signal | Q1.L1.C3 |
| Decoder Ic | Process the received signal data | U1 |
| Loading | closed/released | AU1253L |

When received the signal from remote. The decoder ic (U1) need decode data. According to instruction code process loading with closed/ released status.
