EROAD Solution

EHUBO

The Ehubo is an electronic distance recorder approved as an alternative to mechanical hubodometers. Key features include:

- located on the cab windscreen
- accurately records distance within $\pm 0.5\%$;
- seven year design life and meets highest automotive standards;
- LCD screen to display the unique serial number, distance recorded in Kms, and operating status;
- LCD screen to display electronic RUC licence;
- LEDs to indicate power status and tamper/fault events;
- secure tamper-proof enclosure and hardware design;
- modem to communicate data via Vodafone GPRS cellular network; and
- ability to operate in harsh transport environment in wide temperature band of -40C to 120C.
