

BAP-1 manual

1. Connect the supplied 5V 1.5A switching adapter to USB port as power supply to unit as well as charging up the internal Li battery.
2. Long press power on/off button (marked 4) 2 sec to switch on unit. Long press again 2 sec to switch off.
3. Short press fan button (marked 5) to adjust fan speed. The LED intensity will change accordingly with each press. Higher intensity means higher speed.
4. Short press sweeping button (marked 1) to change the wind sweeping function on and off. LED will light up when it is ON.
5. Short press night light button (marked 2) to switch between night light mode and PM2.5 indication mode. LED will light up when night light mode is ON.
6. Short press music button to switch lullaby playing on or off. LED will light up when lullaby playing is ON.
7. Follow fig 2 to take out the bottom cover for filter replacement. Install back bottom cover afterwards.
8. Follow Bebcare Air app for functions that can be controlled via the app.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
