The image shows a green PCB with a complex layout of components. Key features include:

- Central IC:** A large integrated circuit labeled U1 is the central component.
- Resistors:** Numerous resistors are placed around the IC, including R1, R2, R3, R4, R5, R6, R7, R8, R9, R10, R11, R12, R13, R14, R15, R16, R17, R18, R19, R20, R21, R22, R23, R24, and R25.
- Capacitors:** Several capacitors are present, including C1, C2, C3, C4, C5, C6, C7, C8, and C9.
- Other Components:** Diodes (D1, D2, D3, D4, D5, D6, D7), transistors (Q1, Q2, Q3, Q4, Q5, Q6, Q7, Q8, Q9, Q10, Q11, Q12, Q13, Q14, Q15, Q16, Q17, Q18, Q19, Q20, Q21, Q22, Q23, Q24, Q25), and other passive components are visible.
- Warning Symbol:** A white triangular warning symbol is located on the left side of the board.
- Mounting:** The board is mounted on a light blue surface, and several wires are connected to it.
