Subject: Breach of Confidentiality re: OH27306

To whom it may concern:

It has come to my attention that contrary to our request for permanent confidentiality, the parts list document and electrical schematics for FCC reference: OH27306 are currently available for public inspection.

The above material contains trade secrets and proprietary information as specified by 47CFR 0.457(d) and technical data, which would customarily be guarded from competitors. The public disclosure of this information might be harmful to our company and provide unjustified benefits to our competitors. I would encourage AUTOMATIC enforcement of confidentiality for ALL exhibits in the categories of block diagrams, operational descriptions, schematics and parts list without request. In the digital era, the FCC should not even have the option for release of such documents because of human errors like this one.

Sincerely,

A handwritten signature in blue ink, appearing to read "Bob Vitti", with a horizontal line extending to the right.

Bob Vitti
