SYMPTOM	CAUSE	REMEDY
	b. THE MICROPHONE IS NOT CONNECTED TO THE CHARGING BASE PROPERLY,	b. CHECK THE BATTERY CHARGING INDICATOR LIGHT WHEN THE MICROPHONE IS BEING CHARGED,
	c. BATTERY IS NOT FULLY CHARGED	c. CHARGE THE BATTERY FOR A FULL EIGHT HOURS BEFORE USE

OPERATION TIPS

1. FOR THE BEST RESULT PLACE THE RECEIVER AT LEAST 1 METER ABOVE THE GROUND AND AT LEAST 1 METER AWAY FROM CONCRETE WALLS OR METAL SURFACES TO PREVENT ANY REFLECTION. THE MICROPHONE SHOULD ALSO BE AT LEAST 1 METER AWAY FROM THE RECEIVERS ANTENNA.
2. TURN VOLUME CONTROLS OF THE RECEIVER AND OTHER EQUIPMENT TO A MINIMUM SETTING, THEN SWITCH BOTH THE RECEIVER AND MICROPHONE ON, YOU SHOULD SEE THE GREEN SIGNAL TURN ON TO SHOW IT'S RECEIVING SIGNAL.
3. **WHEN THE MICROPHONE ARE "OFF", BUT THE SIGNAL INDICATOR INDICATOR STILL LIGHT UP, IT MEANS THAT THE RECEIVER WERE INTERFERED. CHECK FOR THE SOURCE OF INTERFERENCE OR CHANGE THE RECEIVERS LOCATION, IF THE INTERFERENCE STILL EXIST, IT MEANS THE CHANNEL IS STRONGLY INTERFERED, CHANGING THE SYSTEM WITH DIFFERENT FREQUENCY IS THUS THE BEST WAY.**
4. PROPER BALANCE THE OUTPUT OF RECEIVER: TURN THE VOLUME CONTROL OF THE RECEIVER TO THE CENTER, THEN ADJUST INPUT LEVEL OF THE MIXER OR EQUIPMENT TO THE APPROPRIATE SOUND.

NOTE: IF THE RECEIVER OUTPUT IS SET TOO HIGH OR MIXER VOLUME CONTROL IS SET TOO LOW, IT WILL CAUSE DISTORTION FROM THE MIXER OUTPUT. ON THE OTHER HAND, IF THE BEFORE MENTIONED SET-UPS ARE REVERSED, THE S/N RATIO WILL BECOME WORSE.
