LNA +STEP ATTENUATOR

This is a 48dB GAIN unit with a 30 dB step attenuator. The step attenuator is used to reduce the Repeater gain when needed, usually to set proper output power . Both Uplink and downlink LNA's are the same except for a ceramic filter that is tuned to the proper band (uplink / downlink)

Downlink power amplifier:

This is a 50W 1dB compression amplifier operated at 10W composite output power. The power is limited by AGC mechanism to keep system performance. The amplifier uses 28VDC, 4AMP. Typ.

This is a Buy product so we have only block diagram.

Uplink power amplifier:

This is a 16W 1dB compression amplifier operated up to 1W composite output power. The power is limited by AGC mechanism to keep system performance. The amplifier uses 28VDC, 1.7 AMP. Typ.
