Section 1 : Equipment Under Test

1.1 Product Identification

The Equipment Under Test was identified as follows:

Deko2119CR (M/N: MW-CMR-PCS-1W80)

1.2 Samples Submitted for Assessment

The following samples of the apparatus have been submitted for type assessment:

Sample No.	Description	Serial No.
1	DEKO 2119 RF Mini Repeater	0602D9069

The first samples were received on: May 24, 2006

1.3 Theory of Operation

The EUT is a booster for the Cellular PCS Band. The EUT contains filters, which can be programmed via software to filter different PCS blocks. The filters are set up as three different parts. The first and second can be set to any frequency block and are variable from 15MHz to 10MHz or 5MHz. The third filter setting is a 20MHz and two 5MHz filters. The frequency of the 20MHz can be set to any frequency but the 5MHz are at a fixed position in relation to the 20MHz filter. At no time can the filters be programmed to overlap each other.
