RE: Victory Concept Industries Ltd.

FCC ID: OJ7901GRM0903

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Please provide schematics that include the reference values, not just reference designators.
- 2) Please explain how this device is compliant with 95.29(f)(2) and 95.181(g)/(h) given that the users manual mentions Call-Ring Tones for GMRS channels/power levels.
- 3) The SAR report does not appear to define the test device as a production unit or identical prototype.
- 4) Due to the scaling used and possible power drift, it would be desirable to provide information regarding drift over time (i.e. single point over time?). If possible, please provide.

A handwritten signature in black ink, appearing to read "Timothy R. Johnson".

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
