

**SUPPLEMENTARY TEST REPORT
FROM
RADIO FREQUENCY
INVESTIGATION LTD.**

Test Of: Adaptive Broadband Ltd.
AB Access EXTENDER

To: FCC Part 15: Subpart E: 2000
(Unlicensed National Information
Infrastructure Devices)

Supplementary Test Report Serial No.:
RFI/MICB1/SUP42151B

This Supplementary Test Report Is Issued Under The Authority Of Richard Jacklin, Operations Director: 	Checked By: 
Tested By: 	Release Version No: PDF01
Issue Date: 27 June 2001	

This supplementary report is issued in conjunction with RFI Test Report Serial No: RFI/MICB1/RP42151A. The report has been issued to resolve the issues raised in FCC Correspondence Reference Number: 2147731, Confirmation Number: TC101128, FCC ID Number: OJB-EX-F058).

This supplementary test report is issued in Adobe Acrobat portable document format (PDF). It is only a valid copy of the supplementary test report if it is being viewed in PDF format with the following security options not allowed: Changing the document, Selecting text and graphics, Adding or changing notes and form fields. Furthermore, the date of creation must match the issue date stated above.

This supplementary test report may be copied in full.

**Test Of: Adaptive Broadband Ltd.
AB Access EXTENDER
To: FCC Part 15: Subpart E: 2000**

1. Client Information

Company Name:	Adaptive Broadband Ltd.
Address:	The Westbrook Centre Block 5 Milton Road Cambridge SB41 1YG.
Contact Name:	Mr A Crisp.

Test Of: Adaptive Broadband Ltd.
AB Access EXTENDER
To: FCC Part 15: Subpart E: 2000

2. Equipment Under Test (EUT)

The following information (with the exception of the Date of Receipt) has been supplied by the client:

2.1. Identification Of Equipment Under Test (EUT)

Brand Name:	AB-Access TM EXTENDER
Model Name or Number:	Subscriber Unit
Unique Type Identification:	None stated by client
Serial Number:	None
Country of Manufacture:	USA
FCC ID Number:	OJB-EX-F058
Date of Receipt:	10 April 2001

Brand Name:	AB-Access TM EXTENDER
Model Name or Number:	Power Supply
Unique Type Identification:	SSL40-3360
Serial Number:	None stated by client
Country of Manufacture:	China
FCC ID Number:	Awaiting certification from FCC
Date of Receipt:	10 April 2001

Brand Name:	AB-Access TM EXTENDER
Model Name or Number:	AB-Access Extender Wall Box
Unique Type Identification:	10000008
Serial Number:	None stated by client
Country of Manufacture:	EU
FCC ID Number:	Awaiting certification from FCC
Date of Receipt:	10 April 2001

**Test Of: Adaptive Broadband Ltd.
AB Access EXTENDER
To: FCC Part 15: Subpart E: 2000**

2.2. Description Of EUT

AB-AccessTM EXTENDER is targeted at providing high-speed wireless internet/video/data/voice access in the FCC UNII bands between 5.725 GHz and 5.825 GHz.

AB-AccessTM EXTENDER adopts a point to point configuration, consisting of two AB-Access extender units. It is a fixed access, point to point infrastructure. The product is targeted for the US market only.

The Subscriber Unit (SU) is routed via a wall box to the network service provider's truncated infrastructure. The SU has an integral antenna with a 10 degree by 10 degree, 3dB beam width to receive/transmit the desired area of coverage. SU units can be installed around the periphery of a tall building or on a tower for optimum line of sight range. Power and data (bi-directional) are routed via braid and foil screened, quad twisted pair, CAT 5 data cable from the internally mounted wall box (similar in construction to a standard BT telephone outlet) up to the SU transceiver/antenna unit. Power and data status is also routed via this cable. Power is provided to the wall box via a standard FCC approved 48V DC power supply. The wall box provides either Ethernet or ATM connectivity via the industry standard RJ45 socket, to the service providers network and end customer systems.

2.3. Modifications Incorporated In EUT

The EUT incorporates the following modifications:

The AB-AccessTM EXTENDER unit has been modified so that it can be driven from a PC test script, enabling the worst case conditions for FCC requirements, to be evaluated and tested for compliance. There are no hardware modifications, as the modification is purely in the software driver. AB Access employs a rapid Time Division Duplex (TDD) air interface, based on Asynchronous Transfer Mode (ATM) networking protocols. Data is transmitted asynchronously on demand, so there is no discernible duty cycle from which averaged measurements can be taken.

The following test modes have been implemented:

- Continuous Transmit Mode (CTM) – this configures the unit for its worst case mode, for EIRP measurements. The unit is set for maximum transmit power, to give the worst case for switching transients, which can cause spurious emissions whilst performing radiated and conducted emissions.
- Continuous Bursted Receive Mode (CBRM) – this exercises the unit if there may be some fundamental frequency components that exceed the receive switch test mode. In this configuration the unit is set to maximum receive gain.

In either of these modes it is possible to change the operating channel and antenna polarisation as required, by means of the PC controller.

Test Of: Adaptive Broadband Ltd.

AB Access EXTENDER

To: FCC Part 15: Subpart E: 2000

2.4. Additional Information Related To Equipment Under Test

Power Supply Requirement:	Nominal 115 V, 60 Hz AC Mains Supply 13 Amp (max) 48 V DC from PSU to EUT
Current Rating:	0.6 Amps
Highest Frequency used or generated within the EUT	5.805 GHz
Type of Device:	Point to Point wireless data system
Antenna Details:	Permanently attached. (Horizontal or Vertical)
Antenna Gain (Declared)	+23dBi
Transmitter Duty:	Continuous
Occupied Bandwidth:	17 MHz
Transmit Frequency:	5.745 GHz to 5.805 GHz
Type of Modulation:	QPSK at 25 Mb/s/sec, raised cosine filter ($\alpha = 0.35$)
Number of Channels:	5 Channels of 15 MHz
Receiver Category:	Superhetrodyne Highest local oscillator frequency 4.9025 GHz
Antenna	Permanently attached. (Horizontal or Vertical)
Tuning Frequency:	5.745 GHz to 5.805 GHz
Method of frequency Generation:	Synthesizer
Intended Operating Environment:	AB-Access™ EXTENDER unit transceivers/antennas are mounted outside with an operating range of -20°C to +50°C. The wall box and power supply are intended to be mounted internally in users building/office/or home.
Weight:	Master Unit = 6.25 Kg PSU = 0.2 Kg Wall Box = 0.05 Kg
Dimensions:	Master Unit = 0.37 x 0.40 x 0.10 metres PSU = 0.11 x 0.045 x 0.03 metres Wall Box = 0.085 x 0.085 x 0.040 metres
Interface Ports:	Wall Box RJ45 Socket - Ethernet or ATM
Cycle Time:	Not applicable

Test Of: Adaptive Broadband Ltd.
AB Access EXTENDER
To: FCC Part 15: Subpart E: 2000

2.5. Support Equipment

The following support equipment was used to exercise the EUT during testing.

Description:	Personal Computer
Model Name:	Dell
Model Number:	PPX
Serial Number:	4898T
Cable Length And Type:	10.0 metres Ethernet cable
Connected to Port:	Local Area Line (LAN) to port 4 on fast Ethernet switch

Description	Fast Ethernet Switch
Brand Name	Netgear
Model Name or Number	FS308
Serial Number	FS38G05015393
F.C.C. ID Number	None stated
Cable Length And Type	9 m Ethernet Crossover Cable
Connected to Port	Port 5 to RJ45 Port on the Wall Box of the EUT

3. Operation of EUT

3.1. Operating Conditions

The EUT was tested in a normal laboratory environment.

During the testing the EUT was powered by a 48 V DC supply from the PSU. The PSU was powered from a 115 V AC, 60 Hz mains supply.

3.2. Operating Modes

The EUT was tested in the following operating modes:

Continuous Transmit Mode at maximum power for transmitter tests.

Continuous Bursted Receive Mode for receiver tests.

The tests were performed with the EUT in both antenna polarisation's and set to the bottom (10), middle (12) and top (14) channels, which are shown in the table below.

The reason for choosing this mode was that it was defined by the client as being likely to be the worst case with regards EMC.

Channel	Frequency/GHz
10	5.745
12	5.775
14	5.805

3.3. Configuration And Peripherals

The EUT was tested in the following configuration:

The AB-AccessTM EXTENDER unit was connected via the S-FTP, CAT 5 cable to the wall box. The power was supplied from the PSU to the wall box. Data was controlled from the support PC to the wall box via S-UTP-CAT 5 Ethernet cables.

The reason for choosing this configuration was that it was defined by the client as being likely to be the worst case with regards EMC and typical of an installation of a users home or office.

3.4. Configuration of EUT During Radiated Emissions Testing.

All six faces of the EUT were orientated towards the measuring antenna during the Effective Isotropic Radiated Spurious Emissions and Electric Field Strength Spurious Emissions tests. All results from these Radiated measurements can be seen in the original RFI test report, RFI/MICB1/RP42151A. The photographs of which show the worst case configuration.

**Test Of: Adaptive Broadband Ltd.
AB Access EXTENDER
To: FCC Part 15: Subpart E: 2000**

4. Summary Of Test Results

**This section cross references the issues raised in FCC Correspondence
Reference Number: 2147731, Confirmation Number: TC101128, FCC ID Number:
OJB-EX-F058.**

Cross Reference Number	Issues / Measurements	Compliance Status / Comment
1.	Internal Photographs of EUT	Please refer to the additional photographs supplied to the TCB
3.	Frequency Stability	Complied Refer to Section 5.2
4.	Photographs of test configuration.	Refer to Section 3.4
5.	Peak Conducted Transmit Output Power	Complied Refer to Section 5.1.1 and Appendix 2
6.	Bandwidth	Complied Refer to Section 5.1.1 and Appendix 2
7.	Peak Power Spectral Density	Complied Refer to Section 5.1.1 and Appendix 2
8.	Peak Excursion of the Modulation Envelope	Complied Refer to Section 5.1.1 and Appendix 2
9.	Antenna Gain	The declared gain of the antenna is 23dBi
10.	EIRP limits using measured bandwidth B	Complied
11.	Bandedge measurements	Complied Refer to Section 5.2 and Appendix 2

4.1. Locaion Of Tests

All the measurements described in this report were performed at the premises of Radio Frequency Investigation Ltd, Ewhurst Park, Ramsdell, Basingstoke, Hampshire, RG26 5RQ, England.

5. Test Results

5.1. Test Results For Conducted Emissions: Transmit Mode

5.1.1. Peak Conducted Transmit Output Power

5.1.1.1. Measurements were performed in accordance with Section 15.407 of C.F.R. 47: 2000, on the bottom, middle and top channels.

5.1.1.2. It was possible to polarise the antenna incorporated within the EUT for both vertical and horizontal polarisation's. Therefore measurements were performed with the antenna polarised in both planes.

5.1.1.3. The peak power measurements were performed conducted at the antenna connector using a peak power sensor.

5.1.1.4. Results are shown for the EUT operating on each of the 3 channels and both the EUT antenna polarisation's stated in section 3.2. Measurements are shown for both transmit power and peak power spectral density. Plots showing the characteristics of the transmitter output can be found in Appendix 2.

5.1.1.5. As specified by 15.407(a)(5), the Peak Power Spectral Density was performed as a conducted measurement by direct connection of a calibrated test instrument to the equipment under test. Similarly, the Peak Power was also measured by direct connection.

Test Of: Adaptive Broadband Ltd.**AB Access EXTENDER****To: FCC Part 15: Subpart E: 2000**

Results: Peak Transmit Power Output and Bandwidth

Channel	EUT Antenna Polarisation	Measured Peak Power (dBm)	Measured Bandwidth (MHz)	Plot No.	Result
10	Vertical	14.9	15.5	A/404	Complied
10	Horizontal	14.9	15.5	A/405	Complied
12	Vertical	15.1	15.8	A/403	Complied
12	Horizontal	15.0	15.8	A/402	Complied
14	Vertical	15.1	15.7	A/400	Complied
14	Horizontal	14.9	15.7	A/401	Complied

Note: The declared gain of the antenna is 23dBi.

Test Of: Adaptive Broadband Ltd.**AB Access EXTENDER****To: FCC Part 15: Subpart E: 2000**

Results: Peak Power Spectral Density (PPSD)

Channel	EUT Antenna Polarity	Measured PPSD (dBm/MHz)	Limit (dBm/MHz)	Plot No.	Result
10	Vertical	11.2	17.0	A/023	Complied
10	Horizontal	10.8	17.0	A/003	Complied
12	Vertical	10.8	17.0	A/019	Complied
12	Horizontal	12.1	17.0	A/006	Complied
14	Vertical	11.4	17.0	A/014	Complied
14	Horizontal	10.9	17.0	A/011	Complied

Test Of: Adaptive Broadband Ltd.**AB Access EXTENDER****To: FCC Part 15: Subpart E: 2000**

Results: Ratio of Peak Excursion of the Modulation Envelope

Channel	EUT Antenna Polarity	Measured Ratio: Peak Excursion	Limit (dB)	Plot No.	Result
10	Vertical	7.2	13.0	A/024	Complied
10	Horizontal	7.3	13.0	A/004	Complied
12	Vertical	8.6	13.0	A/020	Complied
12	Horizontal	8.1	13.0	A/005	Complied
14	Vertical	8.9	13.0	A/013	Complied
14	Horizontal	8.8	13.0	A/012	Complied

Test Of: Adaptive Broadband Ltd.
AB Access EXTENDER
To: FCC Part 15: Subpart E: 2000

5.2. Test Results For Frequency Stability: Transmit Mode

5.2.1. Frequency Stability and Bandedge Measurements

5.2.1.1. Measurements were performed in accordance with Section 2.1055 of C.F.R. 47: 2000 on the bottom and top channels.

5.2.1.2. The EUT's antenna can transmit in both horizontal and vertical polarisations. Therefore conducted measurements were performed at both the horizontal and vertical antenna ports.

5.2.1.3. The test results are presented in graphical format. Plots showing the characteristics of the transmitter output can be found in Appendix 2.

5.2.1.4. The EUT was configured for normal operation as per 15.407(g).

Test Of: Adaptive Broadband Ltd.
 AB Access EXTENDER
 To: FCC Part 15: Subpart E: 2000

5.2.1.5. Summary of frequency stability test results:

Test Conditions (Deg.C)	Measured Frequency Deviation (kHz)	Limit	Result
-30.0	<200	Within the band of operation (100MHz)	Complied
-20.0	<200		Complied
-10.0	<200		Complied
0.0	<200		Complied
+10.0	<200		Complied
+20.0	<200		Complied
+30.0	<200		Complied
+40.0	<200		Complied
+50.0	<200		Complied

Results: Supply Variation

5.2.1.6. The test results are presented in graphical format. Plots showing the characteristics of the transmitter output can be found in Appendix 2.

Frequency Deviation @ +20°C (kHz)				
85% Supply Voltage	100% Supply Voltage	115% Supply Voltage	Limit	Result
<200	<200	<200	Within the band of operation (100MHz)	Complied
