2. SYSTEM COMPONENTS

2.1 Computer

♦ RAM	64 MB 100Mhz SRAM (Minimum).
♦ CPU	Intel Celeron or Pentium II, 300 Mhz (Minimum).
♦ CPU Fan	Pentium CPU Ball Bearing Fan with Passive Radiator.
♦ Motherboard	ATX Form Factor with Intel BX2 chipset.
♦ Hard drive	Western Digital 6.4 GB.
♦ Hard Drive Access	Pull out tray.
♦ External FDD	1.44 MB 3.5" Floppy Disk Drive for Mini Tower.
♦ Keyboard	Standard Windows keyboard.
♦ Mouse	Microsoft PS2 Bus Mouse.
♦ Modem	56K 3COM / US Robotics X2 / V.90 Voice/Data/Fax.
♦ Video card	PCI 3D 4MB VideoRam (Minimum).
♦ Monitor	Hansol, 15" Digital Monitor with flat screen.
♦ Case	Mini Tower with 230w Power supply (Minimum).
♦ Internal L2 Cache	512K (Minimum).

2.2 Computer Protocols

♦ Baud Rate	2400
♦ Word length	8
♦ Parity	None
♦ Stop bits	1

2.3 Printer

- Model — HP LaserJet 1100xi, black and white printer.
- Print speed — Eight pages per minute at 600 dpi.
- Paper input bin — 100 sheets.
- Memory — 5 MB of RAM.
- Weight — Seven pounds.
- Printer cable — IEEE DB25-Cent Printer Cable.

2.4 Software

- Operating system — Microsoft Windows 98.
- Software Owner — Health Sense International, Inc.
- Software — REDEEM Professional Incontinence Management System.

2.5 Transmitters/Receiver

- Transmitter — Redeem transmitter 902 – 928 MHz*
- Receiver — Redeem base station receiver 902 – 928 MHz*

- This equipment has been tested and fond to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. The equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

  - Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.

This equipment has been certified to comply with the limits for a class B computing device, pursuant to the FCC Rules. In order to maintain compliance with FCC regulations, shielded cables must be used with this equipment. Operation with non-approved equipment or unshielded cables is likely to result in interference to radio and TV reception. The user is cautioned that changes and modifications made to the equipment without the approval of manufacturer could void the user's authority to operate this equipment.
