

Reason why the **Block Diagram, External Photos, Schematics, Test Data, Test Setup Photos, and Users Manual** were upload twice:

The reason why the above exhibits were uploaded twice is because one the first attempt to upload these exhibits, we did NOT receive a confirmation screen showing the exhibits had been uploaded successfully. Instead the website reset back to the OET main page without ever showing a confirmation.

We were not sure whether these exhibits had uploaded, so we uploaded the above exhibits again just to make sure they were in the server. (This time we did get a confirmation screen showing they were uploaded).

Any duplicate exhibit is the EXACT same file – just uploaded twice.

Thank you
