RF Exposure

Applicable Standard

According to §1.1307(b)(5), systems operating under the provisions of this section shall be operated in a manner that ensure that the public is not exposed to radio frequency energy level in excess of the Commission's guideline. This is a Portable device. The **Section 4.3.1 and Appendix A of KDB447498 D01 V05 was used as the guidance.**

Calculation Result (Worse case)

$[(\text{max. power of channel, including tune-up tolerance, mW}) / (\text{min. test separation distance, mm})] \cdot [\sqrt{f(\text{GHz})}] = 62.81/20 * 1.55 = 4.87$, this value is less than ≤ 7.5 for 10-g extremity SAR.

Min. test separation distance measured=20mm

The SAR measurement is not necessary.

Note: The shortest distance between antenna and The location where the user operates is 20mm.
