

About reports for SafeCom

The two reports covers two different setups with the SafeCom.

In combination EasyCom Xpress and SafeCom the SafeCom delivers 5 Vdc to the EasyCom Xpress and they are connected with a RS 232 cable.

Combination PlusCom Xpress and SafeCom the two products are only connected with the RS232 cable. This report is the same as for the PlusCom Xpress product alone and is only measured to be sure to cover all possible emission.

The SafeCom can only be used together with a PlusCom or an EasyCom but are sold alone or together with a PlusCom Xpress or an EasyCom Xpress.
