Subject: Resubmittal of Exhibits for PentaCom A/S, Wirsbo Genius Transmitter
Type 98004A with **Confidentiality Requested**

Dear Mr. Czumak:

This serves to confirm our September 1, 1999 discussion and is in response to your August 24, 1999 email message. We are resubmitting **all exhibits** at this time. **The content of these exhibits is identical to those previously submitted.** The files have however been split-up in a way to allow each exhibit to be classified as confidential or not. Please delete the previously sent exhibits.

We are requesting the **following exhibits be treated as confidential** per 0.457 and 0.459 of CFR 47, as they contain trade secrets:

tx_scheme.pdf (this contains the transmission scheme and data protocol)
schematic.pdf (this contains the schematic diagrams)

The following exhibits **do not need to be treated as confidential**:

test_report.pdf (this contains the test report, photos and label location)
block_desc.pdf (this contains the block diagram and system description)
label.pdf (this describes the ID label content)
manual.pdf (this contains the draft user's manual)

Please contact me if you have any questions or need additional information. The applicant is scheduled to begin production shortly, therefore anything you can do to expedite the certification would be greatly appreciated.

Best regards,

A handwritten signature in black ink, appearing to read "Jack Steiner". The signature is fluid and cursive, with the first name "Jack" being more prominent than the last name "Steiner".
