## AccessGate

AccessGate is a kind of Conditional Access System(CAS) manufactured by Goobal Telemann Systems Inc. CAS allows a service provider to provide its subscribers a variety of services such as Pay-Per-View Service by using a smart card. In a person’s smart card, there is the information of what channel group that person can access to, how much tokens are left in the smart card, and what are the usage record. After a certain time has passed, this information is sent back to the service provider. The service provider uses this information to charge its subscriber. To access the CAS service, a subscriber should contact the Service Provider and get assigned a Smart Card.

At the main menu when you select the AccessGate, you will be asked to enter smart card PIN number. Please enter smart card PIN number that you are given when you subscribe to a service provider
