Columbia, MD 21046

SUBJECT: Tellumat (Pty) Ltd.'s FCC ID: ONJMDR2400-EHD  
Confirmation Number EA94985

REFERENCE: Correspondence ID # 11322

Dear Mr. Chan:

Per your request of 1/5/00;

1. The calculation of safe distance for radiofrequency radiation exposure limits has been sent to the file.
2. (a) The 24dBi parabolic antenna was tested at 24dbm (level 5). The actual output when set to level 5 is not exactly 250mW; in this case it was 220mW. The 17 dbi Yagi was tested at 26dbm (level 7). Both of these power levels are in accordance with FCC rules 15.247(b)(1) and 15.247(b)(3)(i).

Page 59 of the manual has been corrected.

200 mW is incorrect. Please change that. The transmitter should be granted 26dbm maximum output power (as used with the 17 dbi Yagi).

(b) This has been changed in the manual.

(c) This has been changed in the manual.

I have also sent a new user's manual to the file.

Should you have any questions with regards to this, or need any further information, please advise.

Regards,

Sharon A. Hoffman/TIMCO ENGINEERING, INC.
