

Date: 4-8-14

Dear Sir or Madam:

The JETIDS14US radio is a model variant and is electrically identical to the previously certified JETIDS16US radio. There are no changes to the antenna and key radiating / metallic structures. As such the JETIDS14US is covered under SAR report number: SAR.20130301 generated for the JETIDS16US.

The differences between the JETIDS14US and JETIDS16US are:

- Software restriction to support 14 output channels
- Removal of 2 toggles switches.
- Plastic knobs, levers, and control stick assemblies in place of aluminum
- Black case color in place of silver

Name: Zbynek Hubacek
