Re: FCC ID: ONTJETIR5US

To Whom It May Concern:

The following application is submitted on behalf of our client, Esprit Model, for evaluation of their model JETIR5LUS for certification under FCC Part 15.247.

The JETIR5LUS is a 2.4 GHz transceiver for remote control toys. The unit hops continuously among 16 non-overlapping channels in the 2405 MHz to 2480 MHz frequency range using a Jeti proprietary application based on the 802.15.4 platform. The FCC ID: ONTJETIR5US includes other model variants in addition to the JETIR5LUS. These are JETIR5iUS, JETIR4LUS, and JETIR4iUS. The PCBs for these models are identical. The models differ in terms of the number of I/O ports, and antenna cable lengths. The details about these different models are provided with this submission.

The FCC ID: ONTJETIR5US was tested in full for the model JETIR5LUS to the aforementioned test requirements and was found to be in compliance.

Sincerely,
