Re: FCC ID: ONTJETIR5US

To Whom It May Concern:

The following application is submitted on behalf of our client, Esprit Model, for evaluation of their model JETIR3US for a permissive change under FCC Part 15.247.

The purpose of the permissive change is to document the SAR performance of the JETIR3US after integration within the JETIDS6US host device. There are no modifications on the product since the original certification. The host device was modified with a LAIRD ferrite model 28A0350-0B2 to meet the unintentional emissions requirements. The unintentional emissions results are documented in the verification test report.

The JETIR3US was tested for SAR when integrated into the JETIDS6US and was found to be in compliance.

Sincerely,
