

To whom it may concern,

I reviewed part 2.201 and all of the designator codes look correct.

16M6 - the 99% BW is 16.6 MHz

D (4) Emission in which the main carrier is amplitude and angle modulated either simultaneously or in a pre-established sequence.

7 (5) Two or more channels containing quantized or digital information.

D (5) Data transmission, telemetry, telecommand.

Sincerely, James Carlson
