Re: Model differences

Hello Jenny, This letter is to inform you of the model differences for our FCC application for the RLX2-IHNF series. There are 3 models total and the differences are;

RLX2-IHNF "indoor unit mounted inside an enclosure by the end user"

RLX2-IHNF-W "outdoor unit mounted inside/outside of a structure, predominately outside" by installer. Only hardware difference is the enclosure, all other hardware is identical.

RLX2-IHNF-WC "outdoor unit mounted inside/outside of a structure, predominately outside" by installer. Only hardware difference from the -W is the termination is conduit. All other hardware including enclosure is the same.

Sincerely,

Frank Hardy
Compliance/Regulatory Engineer
