ABOUT THE TRANSMITTER TX234 :

This accessory can be worn at all times. Whenever an emergency arises, the transmitter will send an alarm to the SLU and then immediately communicate that emergency to the control center, and a two-way HFM* session will be automatically activated.

THE MAN DOWN:

This man down operates by the position of the unit. Whether the client wears the unit on his belt or as a pendant, should this unit not be in a vertical position for a period of 10 sec it will begin to beep for another 10 sec before transmitting a signal to the control center. The client can abort the transmission during this time by pressing the button on the transmitter.

THE TETHER:

This unit is worn as a pendant or clipped on to a belt. It transmits a signal to the SLU every 15 seconds. Should the client wonder outside the perimeter, the SLU will transmit this info to the control center advising that client has wondered off.

This unit doesn't require away installation.

They maximum rage of this unit is 100Ft (31Meters) open air.

It is important that the receiver (SLU) is located on a non-metallic surface.

LOW BATTERY:

In the event of a low battery condition this unit will transmit to the control center a low battery signal approximate every 11 hours or until the battery is replace in the transmitter.

Note: HFM* = Hand Free Mode

INTERNET SECURITY LIFE GUARD

Subscriber Warranty

Please complete all sections of this warranty card and return to your dealer/distributor.

The Internet Security Lifeguard is a precision electronic system manufactured to the highest standards. This warranted for life against any manufacturing defects as long as the initial purchaser subscribes uninterruptedly to Internet Security Lifeguard monitoring services.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

NOTICE:

The Industry Canada Label identifies certified equipment. This certification means that the equipment meets telecommunications network protective, operational and safety requirements as prescribed in the appropriate Terminal Equipment technical requirements document(s). The department does not guarantee the equipment will operate to the user's satisfaction.

Before installing this equipment, users should ensure that it is permissible to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations.

Repairs to certified equipment should be coordinated by a representative designated by the supplier. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user to disconnect the equipment.

Users should ensure for their own protection that the electrical ground connections of the power utility, telephone lines and internal metallic water pipe system, if present, are connected together. This precaution may be particularly important in rural areas. **Caution:** Users should not attempt to make such connections themselves, but should contact the appropriate electric inspection authority, or electrician, as appropriate.

NOTICE: The Ringer Equivalence Number (REN) assigned to each terminal device provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence number of all the devices does not exceed 5.

INFORMATION TO USER

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for Class B Digital Device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful

interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does not cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

Any changes or modifications not expressly approved by Internet Security Lifeguard could void the user's authority to operate the equipment. If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved. For repair/warranty information. The telephone company may ask you to disconnect this equipment from the line network until the problem has been corrected.

This equipment cannot be used on public coin phone service provided by the telephone company. Connection to party line service is subject to state tariffs. Your telephone company may discontinue your service if your equipment causes harm to the telephone network. They will notify you in advance of disconnection, if possible. During notification, you will be informed of your right to file a complaint to the FCC.

Occasionally, your telephone company may make changes in its facilities, equipment, operation, or procedures that could affect the operation of your equipment. If so, you will be given advance notice of the change to give you an opportunity to maintain uninterrupted service.

This equipment complies with Part 68 of the Federal Communications Commission (FCC) rules for the United States.

A label is located on the underside of the base unit containing the FCC registration number. You must upon request, provide the following information to your local telephone company: Facility interface Code: ; Service Order Code: ; USOC jack Type: .

Should you experience trouble with this telephone equipment, please contact your dealer.
