

WARNING !

WARNING: To comply with FCC RF exposure requirements, a minimum separation distance of 40 feet in front of the Invisible Fiber™ unit is required between this antenna and all persons while the transmitter is ON. Radio transmitter is ON when red light indicator on the back side of the radio enclosure is illuminated. Observe RF energy exposure safety limits, applicable rules, and service interruption cautions in the product manuals. Serious bodily injury may result.

RF safety warning section of the product label. Labels will be affixed on both sides of the product. See FCC part 101 report, page 17 for location of the label and relative size.

Label Size: 3.5 x 7 inch (WxH)

Label Location: Permanently attached on each side of the radio enclosure. Label is visible when standing near the front and around the back of radio.

Label Vendor: Hazard Communications Systems, Inc. Reorder No H60003-GVDVPZ. Label meets ANSI Z535.4 safety label standard and ISO 3864 marking standard.
