

FLOATED CAMPING LANTERN

Function:

Floating / Waterproof.

To make the fluorescent U-Tube last longer-allow 20-30 seconds between turning on and off. (Do not turn on and off repeatedly)

For Model RU-811RP & RU-811R only:

Using the Remote Control, just hold the button for less than 0.5 second to turn on the light and turn it off for holding over 1.5 second.

When the power of the batteries in the Lantern is less than 4V, new batteries must be changed otherwise the Remote Control cannot be used.

For Model RU-811RP & RU-811P only:

The Lantern can be operated by batteries or by car plug.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B ISM equipment, pursuant to Part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio TV technician for help.
