RE: FCC ID: OSZ37200M-10

Attention: Rita Cai

I have a few comments on this Application.

- 1 Item 10 of the 10-08-02 request for information has not been resolved. The FCC has stated that calibration of the probes used in SAR measurement need be calibrated 100MHz of the target frequency. The highest frequency of calibration data for the probe used is 1900MHz, the device center frequency is 2430MHz. Please address this issue. You must resolve this calibration issue of the probe before a grant can be issued. Please re-test the device using a properly calibrated probe.

A handwritten signature in black ink that reads "Dennis Ward".

Dennis Ward

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination.

Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
