Applicant's declaration concerning RF Radiation Exposure

We hereby indicate that the product
Product description: Bluetooth Speaker
Model No: BT-02

The equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. The integral antennas used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter within the host device.

A safety statement concerning minimum separation distances from enclosure of the Product : Bluetooth Speaker will be integrated in the user's manual to provide end-users with transmitter operating conditions for satisfying RF exposure compliance.

The appropriate information can be drawn from the test report no: HA140008-FID and the accompanying calculations:

According to KDB 447498 D01 General RF Exposure Guidance v05r02, the 1-g SAR test exclusion thresholds for 100MHz to 6GHz at test separation distances of 50mm are determined by:

$$[(\text{max. power of channel, including tune-up tolerance, mW}) / (\text{min. test separation distance, mm})] * [\sqrt{f(\text{GHz})}] \leq 3.0 \text{ for 1-g SAR, where}$$

max. power of channel, including tune-up tolerance: 0.7 mW

min. test separation distance: 50 mm

Frequency: 2.45 GHz

Result of Calculation: 0.02196

The result of calculation is far below 3 . Therefore, SAR test is not required.

Company: ForeShot Industrial Corporation

Address: No.7-1, Mincyuan Rd., Dayuan Shiang, Taoyuan County, Taiwan
