Federal Communications Commission
Authorization and Evaluation Division
7435 Oakland Mills Road
Columbia, MD 21045

SUBJECT: SB TELCOM CO., LTD.'S APPLICATION FOR CERTIFICATION
FOR THEIR FCC ID: OTVGMRS1100

CONFIRMATION #: EA479274

To Whom It May Concern:

The above mentioned application, testing report, and all exhibits were submitted on 1/31/02.

Once the applicant received his file copy of the report, he questioned us on the output power. They then advised us of a switch that we should have used to change the device to HIGH output power. We rechecked their high output power and found that it is .8 Watts instead of the reported .23 Watts reported.

I've uploaded a modified test report reflecting the correct output power of .8 Watts and this letter will serve as a request to correct the 731 form.

No modifications were made to the device; the output power measurement was taken on the original sample sent to us for testing purposes.

Should you have any questions with regards to this, please advise.

Regards,

Sharon A. Hoffman
