Dear Sir/Madam,

RE: Declaration regarding Microlise MTU4-A and MTU4-B

We, Microlise Limited declare that the only differences between Microlise type numbers MTU4-A and MTU4-B is that the –A part has integral GSM and GPS antennas, whereas the –B part has connectors to which external GSM and GPS antennas are connected. Apart from these differences the products are identical in all other mechanical respects and are identical in all electrical and RF aspects.

The following figures show the differences:

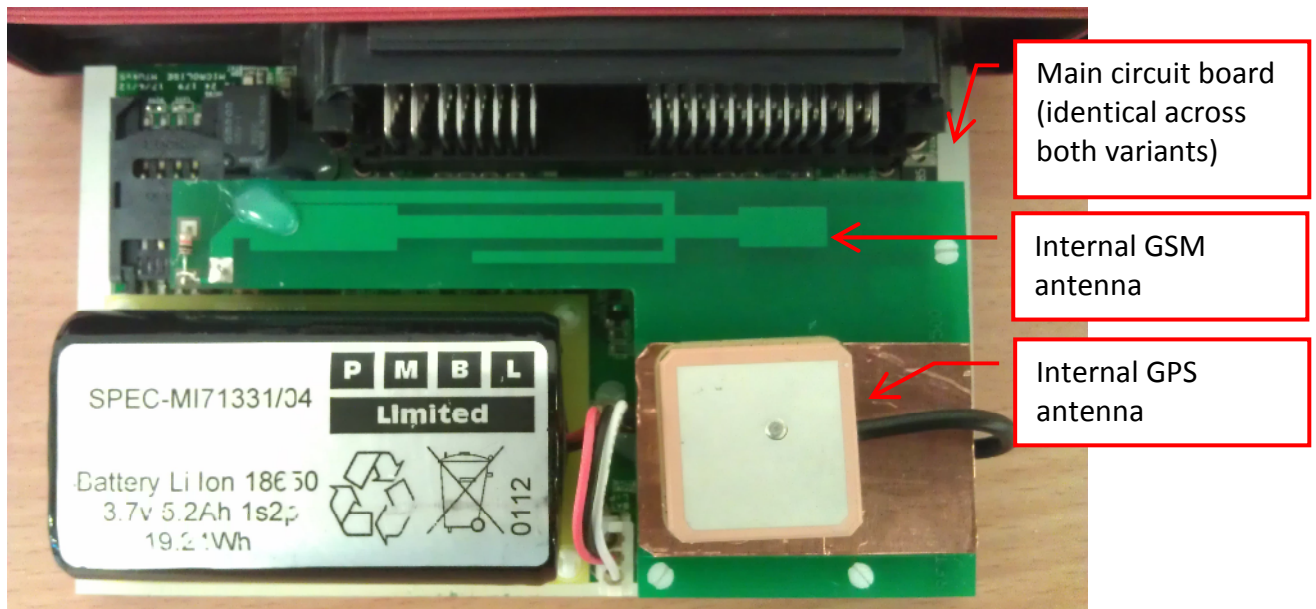

Fig 1. MTU4-A internal view

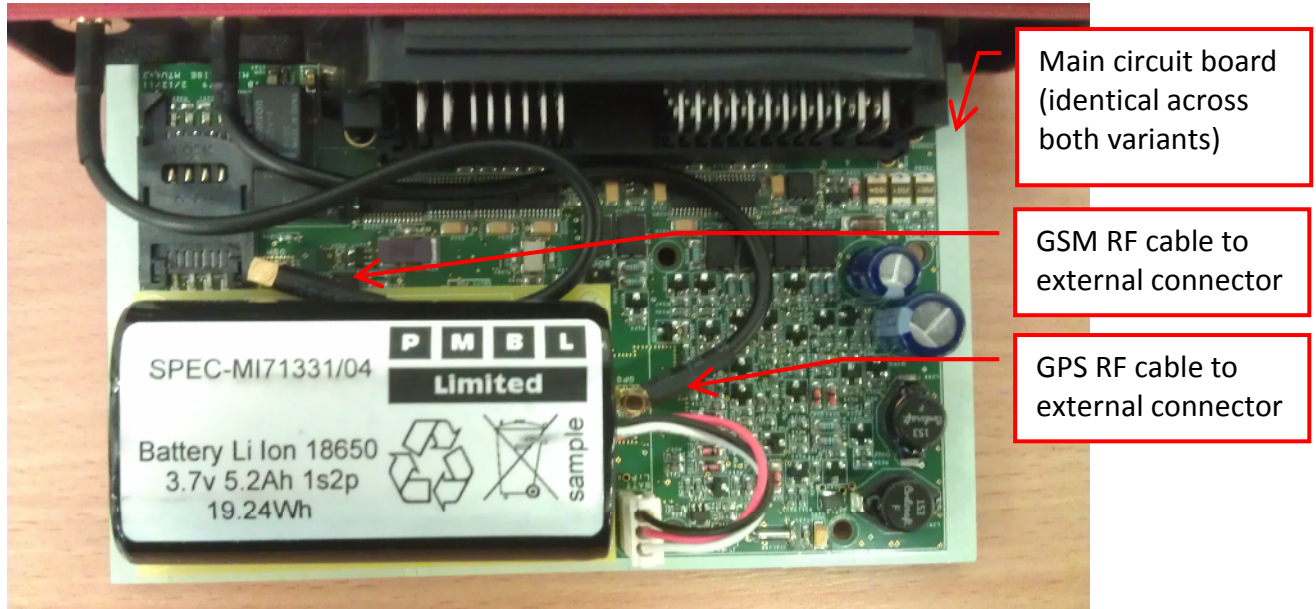

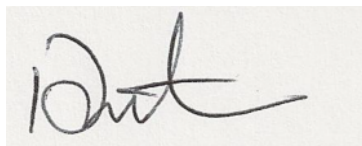

Fig 2. MTU4-B internal view

We further declare that both variants share the same schematic and PCB, are manufactured from the same basic bill of materials, contain the same software and firmware and follow identical quality and manufacturing processes.

Kind Regards,

Ian Dickinson
Director of Technical Services
