

Request for confidentiality  
Original grant issued 29.2.2000  
FCC ID: OUWNETHAWK-N2

§0.459

a) I want that the following documents are classified as confidential

- block diagram
- external photos
- part lists
- all schematics

b)

The information that has been delivered to FCC must be handled confidentially, because from that information competitor or another person

can easily obtain detailed information how our product will work, which kind of design our product is based on, which components are needed to build our product and which are the critical components for our product.

With these information competitor can effect to us economical losses if he is planning same kind of product or if is obtaining itself our critical components so much that the operation will cause an allocation of components. This kind of operation of the competitor causes us very big economical losses, because our deliveries to customers will be delayed, we will lose market share to competitor and possible juridical tasks with competitor are needed. In the worst case losses in business transaction will shake our economy and we must give up the sections that have vital of importance to us and we must redesign our product so that it will be based of new solutions.

Furthermore, the electrical design of our product is our own know-how and proprietary and it can be compared to the solution which can be patented.

The demanded time period for confidentiality is ten years.
