STATEMENT OF SECURITY CODE

FCC ID :

Cordless telephone shall incorporate circuitry which makes use of a digital security code to provide protection against unintentional access to the public switched telephone network by the base unit and unintentional ringing by the handset (FCC Part 15.214(d)).

There must be provision for at least 256 possible discrete digital (FCC Part 15.214(d)).

Manufacturers must use one of the following approaches for facilitating variation in the geographic distribution of individual security codes (FCC part 15.214(d)(2)).

Provide a fixed code that is continuously varied among at least 256 discrete digital code as each telephone is manufactured. (FCC Part 15.214(d)(2)(ii)).

- We provide a fixed code that is continuously varied among 65,536 discrete digital codes as each telephone is manufactured.
