March 7th, 2001

Federal Communications Commission,
Via Electronic Filing

Applicant: NOKIA MOBILE PHONES (Germany)
Equipment: FCC ID: OW3BT101 EA98731
Corres. Errol Chang 17744

This letter is in response to the questions raised:

The Applicant understands that professional installation does not apply to modular approval. The peak conducted output was measured with the device connected to an HP E4418B power meter and HP E9300A sensor.

Item 1. There is only one dBi integral antenna for this filing.

Item 2. Since the M.P.E. test data is not needed, please disregard. The Applicant wanted it included for Information only.

3. This module will be used in NOKIA products only. There are no other suppliers. Any typos will be corrected in the final R.F.Exposure Statement.

Balance of items 1 through 22. Section 15.247: Attached please find Grantee's response to these items.

We trust the Applicant has responded to all your questions and that a Grant will be forthcoming A.S.A.P.

Personal regards,

A handwritten signature in black ink, appearing to read 'M. Flom', is written over a horizontal line.

MORTON FLOM, P. Eng.
